

# Student Resource Portal - Deliverable #1

## HTML & Content

**Date:** January 24, 2025

## Project Purpose

The UMSI Student Success team seeks to improve its web presence by designing a new website to better help students understand and locate resources available to them. The new site will feature an accessible and responsive design that works on multiple devices, a modern look and feel, and a refreshed site architecture and site content.

- Github Repo URL: [https://github.com/nataliaroserice/client\\_project\\_html\\_w25.git](https://github.com/nataliaroserice/client_project_html_w25.git)

## Our Commitment:

### Deliverable #1 - HTML & Website Content

- This will include all of the content in multiple structured html files - this includes all text (including alt text) and images.
- This will not be a styled website as we want to start with semantic structure first and ensure that we have the content we need to make the site successful
- This website will be fully accessible and will pass accessibility validators such as WAVE and Axe.

---

## SI 539 Winter 2025 Client Proposal - Mobile Deliverable

---

### Meets Client's Objectives

**Explain what content you chose (text, images, etc) for your website and how it how it meets the client's needs for an updated website for Student Support Resources to better help students find and utilize resources available to them on campus to help them:**

- Be more successful academically
- Achieve better school/life balance
- Find resources in times of crisis

[enter your response here]

**Explain how you chose to structure your content using appropriate semantic html and why you organized it that way.**

[enter your response here]

**Explain how you ensured that your site is fully accessible and usable for all students - including those with different disabilities.**

[enter your response here]

**Explain how your design makes it easy for students to find resources and understand how to utilize them.**
